profile

Pablo Murad is a Brazilian entrepreneur, self-taught programmer and independent writer with a background in business management, education, law and computing. He leads Grupo Murad / Portal IDEA and works to make education and technology more accessible.

Online since 1995, he began programming with Delphi 3 in 1997 and started learning Python in 1999. His technical interests include Unix and BSD systems, self-hosting, networks, shared shells, pubnixes and the independent web. He believes access to education is a fundamental right and that learning should last a lifetime.

technology

Pablo has written code since childhood and works with development and infrastructure tools. His interests extend to Linux, OpenBSD, Unix networking, terminal environments and self-hosted services.

`Python` `Node.js` `Rust` `Flask` `PostgreSQL` `MySQL` `MongoDB` `Docker` `Linux` `OpenBSD` `Unix networking` `Self-hosting`

He maintains independent projects about shared computing, online communities, personal publishing and alternative internet protocols. Among them:

runv.club	A community built around shared Unix shells, experimentation and learning.
noctem.cafe	An OpenBSD pubnix, under construction.
noctem9.cafe	An experimental 9front/Plan 9 shared computing space, under construction.
ascii.zone	ASCII/ANSI art, digital culture and alternative internet protocols.
bimb.ooo	An independent, experimental web and community project.

He is also interested in the IndieWeb, especially POSSE (Publish on your Own Site, Syndicate Elsewhere), digital autonomy and keeping the web open and personal.

writing

(En)Cena: author profile

2013–2016
